Glenview, IL | 773-968-6382 | taherabushihab@icloud.com | [LinkedIn](#) | [Portfolio](#)

SKILLS

- **Software:** SolidWorks, ANSYS, Office 365
- **Languages:** Arabic

EXPERIENCE

Apple, Inc.

Technical Expert

04/2026 - Current

- Perform precision hardware repairs on Apple devices, including display, battery, camera, back glass, and logic board replacements using Apple-certified procedures.
- Diagnose complex hardware and software failures, execute post-repair testing, and resolve escalated technical issues while maintaining repair quality and customer satisfaction.

Technical Specialist

10/2024 - 04/2026

- Diagnose and resolve hardware/software failures using structured troubleshooting to restore device functionality and reduce repeat issues.
- Mentor team members on systematic troubleshooting approaches to improve resolution accuracy and efficiency.
- Document failure modes, corrective actions, and performance trends to support quality control and continuous process improvement.
- Communicate technical findings clearly to align expectations, drive next steps, and ensure accurate handoffs/escalations.

Sales Specialist

11/2023 - 10/2024

- Deliver consultative, needs-based product recommendations by translating customer goals into technical solutions (devices, accessories, services), consistently meeting sales and experience targets.
- Educate customers on product features, setup, and ecosystem integration to improve adoption and reduce post-purchase issues, ensuring a smooth onboarding experience.

Zayedo, LLC

Owner/Operator

10/2020 – Current

- Manage sourcing, logistics, marketing, and website operations to support end-to-end order fulfillment.
- Conduct market research and implement advertising strategies to drive sales growth and improve product positioning.

PROJECTS

Skateboard Deck Structural Analysis

08/2025 - 12/2025

- Designed and modeled skateboard deck geometry and support configuration in SolidWorks.
- Performed static structural FEA in ANSYS to evaluate von Mises stress and deformation under loading.
- Conducted mesh refinement and convergence checks to improve result accuracy and reliability.
- Optimized support spacing and material selection; identified an optimal configuration (110 mm spacing, copper alloy) achieving low stress (0.373 MPa).
- Produced a clear engineering-style report summarizing assumptions, boundary conditions, mesh settings, and key results to support design decisions and reproducibility.

Multi-Purpose Brush

08/2025 - 12/2025

- Modeled a 7-part multi-component pet brush in SolidWorks, including a threaded interchangeable brush head and hinged two-piece handle for modular use.
- Built and constrained the full assembly using mates; validated interfaces/clearances for reliable fit and motion.
- Created manufacturable brush geometry by generating a patterned bristle array and integrating it into the head.
- Produced an exploded assembly drawing with balloons and a complete BOM for assembly documentation.

EDUCATION

University of Illinois at Chicago

Bachelors, Mechanical Engineering

Chicago, IL

Expected Graduation: 2027

Oakton College

A.S. Engineering

Des Plaines, IL

Graduated: 2024
